Original and all-inclusive Leatherman multi-tools
<u>Attention tool and gadget freaks</u> (and those who love them): Maybe you think you've seen all-in-one tools, but if you've never experienced the Leatherman, then you're missing out on what may be the most useful hand tool ever invented. Often imitated, the **original Leatherman** became an instant classic when it was introduced in 1982. Its amazing multifunctional design includes wire cutters, strippers, screwdrivers, file, bottle opener, knife blade, 8-in/20-cm ruler, and needle-nose and regular pliers—all in a compact four-inch, six-ounce tool.

The new **all-inclusive Leatherman** actually improves on the original with two locking blades (straight-edge and serrated) that open with a single flick of the thumb, diamond-coated file, wood saw, scissors, and lanyard attachment. It even surpasses the original in handle comfort. No matter which Leatherman you own, it's sure to become the most useful tool you own for home, shop, car, or bike use—anytime, anywhere. Leatherman tools feature heat-treated stainless steel construction and precision machining to laser micrometer tolerances. Made in USA. 25-year warranty.
